- 1) Classwork - 8%
- 2) Homework - 8%
- 3) Laboratory - 8%
- 4) Quiz - 38%
- 5) Test - 38%

Summer Session

Students taking AP Chemistry are requested to participate in a four week refresher course of HS Chemistry. The four weeks will be the weeks of July 6, 13, 20, and 27th. The students will attend a 2.5 hour session on either Tuesday or Thursday of each of those weeks from 12:30 - 3:00 pm. We will be covering Chapter's 1 - 4 during this period. A test will be given each week on the material reviewed. It is strongly advised that all students be prepared to spend at least 1 hour daily of this material and to complete all homework problems in the back of the chapters starting with Chapt. 1.
