

# NOVEMBER 18

## VAPING, ALCOHOL & CONCENTRATES

### What you need to know-

Current statistics show that 1 in 3 High School Students have tried vape. Currently there is an alarming trend in middle and high school students using vapes and becoming addicted to nicotine. Most youth believe fluid only contains water and flavoring. This program will help parents learn all current information about END/EID systems. Harmful toxins, chemicals, and diseases associated with vaping will be discussed. Marijuana concentrates will be reviewed and discussed along with the legal ramifications of having devices and or other paraphernalia. Marijuana edibles will also be explained as it is very easy to poison one's self if ingesting products. We will also cover important talking points about alcohol consumption.
