AP Chemistry Summer Packet 2019-20

Get excited (and ready) for AP Chemistry! Included in the packets are information about the exam and information you should KNOW (memorize or be able to derive from the wonderful periodic table) or be able to CALCULATE. FYI—the Periodic Table on the AP exam has NO NAMES given, only symbols.

Don’t freak out about the packets! You probably know more than you think. The answer key will be available to those who email me with proof that the packets have been completed. If you need more practice in a certain area, let me know. We will start class in September with the expectation that you are competent with ALL of this material. Your first test and the due date for the packets will be September 5th (A Day) or 6th (B Day).

Please do not procrastinate! Pace yourself over the summer. If you need help let me know!

Google Classroom
- Join our Google Classroom: ytvop9s
- The password to open summer work electronically will be posted on there.
- Electronic copies of all handouts and notes will be posted on there (in case you lose your hard copy).

Need Help?
- Drop by room 311 before the end of the school year
- Email me at mgreenwood@teachers.rbrhs.org (I prefer the RBR Google account email as it goes to my phone and I can respond faster)
- Contact me through Google Classroom

The 2020 AP Chemistry Exam will be Thursday, May 7th!

Due on September 5/6, 2019:
- Read Chapter 1-3, 6, and 7.
- Summer Work Packet #1 (Cengage Foundational Knowledge)
- Summer Work Packet #2 (Princeton Review Big Idea #1)
- Signed Syllabus
- Signed Safety Contract
- Complete Student Info Google Form (posted on Google Classroom)

Upcoming Test/Lab Dates:
- Summer Work Test (Based on assigned textbook chapters and Summer Work packets) - Sept 5/6
- Determining the Empirical Formula of Silver Oxide Lab - Sept 9/10
